ABOUT ME

I am a self-motivated iOS Developer looking for a challenging position where my technical, analytical, and problem-solving skills can be a valuable addition.

SKILLS

MY SPECIALITIES

- iOS Development
- Swift
- Auto Layout
- SwiftUI
- Accessibility
- Combine
- Git & GitHub
- Clean Code
- UI/UX Design
- Android Development

SOFT SKILLS

- Teamwork
- Pair Programming
- Time Management
- Leadership

WORK EXPERIENCE

Aug, 20

RW iOS Interview Practice Project

Features I have implemented include enabling users to view the available tutorial posts, filtering options based on the type of content (article or video). Supports **Dynamic Type** (allows users to increase the text size based on their preferences). Also supports **VoiceOver Accessibility**. Utilised libraries including UIKit, URLSession, CollectionView, and Combine

Jul, 20

Git Explorer - iOS

An iOS app I developed during the RW Bootcamp to help fellow bootcampers learn and work with git commands. APIs I have used to develop this app includes Codable, Selection Picker, Custom UIView, AutoLayout. Some of my classmates enhance the quality/functionality of the app and created **pull requests** which I merged with my codebase.

Dec,18 - May,20

Junior Android Developer
Bangladesh Youth Leadership Center

I was the first Android Developer to join this Non-Profit organization. So I had to develop and maintain its educational Android App independently.

- UI/UX: Took the initiative to do user research to remain relevant in the market. Prepared a questionnaire form and surveyed 600+ students from high school to the university level with support from other teammates. Analyzed the survey data to find out user pain points and redesigned the app based on those insights.

- Maintaining the App: The app was based on an open-source platform called OpenEDx. Customized the look and feel of the app and kept the project up to date. Also built multiple variants of the app from the same source code for corporate clients.

SPEECH

Introduced **Kotlin Coroutine** in the local Android Meetup at Dhaka. Motivated the listeners to start thinking of introducing Coroutine into their codebases. Discussed how easy it is to use kotlin coroutine and its first-class support in the Android SDK.

INTEREST

- Learning
- Travelling
- Cycling
- Swimming
- Writing

COURSES & TRAINING

May,20 - Aug,20

Raywenderlich iOS Bootcamp

Went from zero knowledge to Junior level iOS developer through this Bootcamp. Learned about Swift, UIKit, TableView, CollectionView, SwiftUI, Core Data, URLSession, GCD, etc. and implemented them in my app within only 13 weeks. Developed confidence to work on the production application by completing weekly assignments. Worked in a team to enhance teamwork skills, and practiced pair programming as well as collaboration on GitHub.

Dec,16 - Mar,17

Building Bridges Through Leadership Training

This is a 4-month long leadership training course offered by the premier leadership institute in Bangladesh. I secured a place with a scholarship after the three rounds of competitive admissions process.
The program helped me learn teamwork, communication and leadership. I worked with a diverse group of students from dramatically different socioeconomic backgrounds and learned to respect each other's views even when we do not agree.

Jun,16 - Present

Mooc Courses

Always love to learn new things. Participated in various mooc courses including:

- Introduction to Programming in Swift 5
- Introduction to iOS App Development with Swift 5
- Introduction to UI Design
- Algorithmic Toolbox

EDUCATION

Daffodil International University
2016 - Ongoing

Bachelor of Science in Computer Science and Engineering

Final semester student
CGPA 3.94 out of 4.00
